Open to remote roles from India; on-site / hybrid in Surat

Professional Summary

Data analyst specializing in SQL and Python data pipelines, Databricks lakehouse integration, and data quality. Experience spans incremental processing, schema alignment, lineage validation, and Power BI semantic models, with personal projects in dbt contract repair and data provenance.

Technical Skills

Programming & Querying: SQL, Python, PySpark, Spark SQL

Data Platforms: Azure Databricks, Delta Lake, Unity Catalog; dbt, DuckDB and SQLite (personal projects)

Engineering: ETL/ELT, Medallion Architecture, change data capture (CDC), dimensional modeling, schema validation, data reconciliation, REST APIs

Analytics & Delivery: Power BI, DAX, Power Query, Tabular Editor, Git, Azure DevOps

Professional Experience

Data Analyst I

Feb 2026 – Present

Brentwood Industries, Inc.

Vadodara, India

- Integrated ERP data into a Databricks lakehouse using SQL and PySpark, resolving schema and data-type differences while preserving reporting requirements.
- Implemented CDC transformations with deduplication and rerun controls; corrected join and casting issues to improve Delta Lake processing reliability.
- Built reusable checks for key integrity, join cardinality, schema compatibility, and source-to-target reconciliation, producing traceable validation evidence.
- Reworked column-lineage validation in SQL to reduce processing time and make dependency analysis more efficient.
- Reconciled Power BI semantic models with lakehouse outputs and automated DAX measure management through Tabular Editor scripts.
- Prepared data mappings, deployment documentation, and review-ready code changes to support cross-functional delivery and handover.

Data Analyst (Data Pipelines & Analytics)

Apr 2023 – Dec 2025

IITS – Integrated IT Solutions

Surat, India

- Automated recurring data preparation and reporting workflows using Python and SQL stored procedures.
- Refactored SQL reporting queries and supported multi-source ERP and CRM integration into shared staging structures.
- Developed statistical sales-forecasting workflows to support inventory and financial planning.
- Built Power BI dashboards with KPI monitoring, automated alerts, and drill-through analysis for business stakeholders.

Data Analyst Intern

Apr 2022 – Mar 2023

IITS – Integrated IT Solutions

Surat, India

- Wrote SQL queries and Python scripts for data cleaning, transformation, and validation in analytical workflows.
- Documented data models, source-to-target mappings, and business transformations; developed relational models and BI prototypes.

Selected Personal Projects

DriftDoctor – dbt Contract Repair

[GitHub](#)

Python, dbt, DuckDB, local AI

- Developed a local workflow for diagnosing and repairing dbt contract drift using deterministic repair rules, guarded edits, and executable contract checks in a disposable sandbox.
- Constrained AI-assisted dependency resolution to observed candidates or abstention, producing a reviewable diff and report for human approval.

CompatForge – Compatibility Evidence Pipelines

[GitHub](#)

Python, DuckDB, dbt, JSON Schema, Next.js

- Built ingestion and transformation workflows for device identities and compatibility evidence, preserving provenance, freshness, and explicit schema contracts.
- Implemented a deterministic compatibility resolver that distinguishes vendor statements from observations and preserves unknown or conflicting evidence.

OriginKeep – Local File Provenance

[GitHub](#)

Tauri, Rust, React, TypeScript, SQLite

- Developed a local desktop application and browser companion linking file origins, SHA-256 content identity, version lineage, and remote freshness evidence.
- Added portable provenance records and recoverable archive/restore workflows to preserve metadata and support file lifecycle tracking.

Education

Bachelor of Science in Information Technology

2020 – 2023

Parul University, Gujarat, India

GPA: 8.73 / 10

Leadership: Google Developer Student Club (GDSC) Lead; organized a technology hackathon.

Selected Professional Development

- ETL in Python and SQL – LinkedIn Learning, Aug 2025
- SQL for Data Analysis – Luke Barousse, Mar 2025
- Microsoft Power BI Data Analyst Associate (PL-300) Cert Prep by Microsoft Press – LinkedIn Learning, Apr 2025 (exam-preparation course)
- Data Visualization for Data Analysts and Analytics – LinkedIn Learning, Aug 2025
- Regression Analysis Fundamentals – LinkedIn Learning, Apr 2026
